# MARKER FOR T-SHIRT

## DESIGN YOUR OWN ORIGINAL T-SHIRT

For use on T-SHIRTS, SWEAT-SHIRTS, JEANS and other cotton fabrics.

# HOW TO MAKE YOUR OWN ORIGINAL T-SHIRT

### HOW TO GET GOOD RESULTS

#### What you'll need

- Artline **SHIRT MARKER**
- Artline LAUNDRY MARKER (EK-750 black)
- Design
- Cardboard
- T-shirt (100% cotton)
- Iron

1

Attach a design to a piece of card with clear or paper tape.

2

Insert the card & design inside the T-Shirt and position required.

3

Fold the sides of the T-Shirt behind the card and secure them with clear or paper tape.

**Tips** Keep the front side of the T-Shirt from wrinkling. It makes line work easier.

4

Use a fine nib black or dark coloured **SHIRT MARKER** or the EK-750 to trace the outline of the design.

**Tips** At this stage a rough outline is OK because you'll re-trace later.

5

Fill in the design with **SHIRT MARKER**.

**Tips** Keep applying colour until there is no white visible in the coloured areas. Gently stretch the material to check unpainted area is not left.

**Tips** Lastly, colour small and detailed areas.

How to fill in wide areas

How to fill in narrow areas

6

A thick emphasis to outlines using a black or dark coloured **SHIRT MARKER** or the EK-750 will add depth and contrast to your design. Modify any unsatisfactory areas.

7

Remove the card from the T-shirt. After the ink has dried, gently iron over the design at a medium heat to fix the colours.

#### Point

- Painting over other colours before ink dries will add a gradational effect. Note: A pen nib will get dirty.
- After ink dries, you may overglaze.
- You can also use colour photos or magazine cutouts as T-shirt designs.

### 3.Globally Harmonized System of Classification and labeling(GHS) :

The GHS is designed to alert workers and consumers to the potential dangers of chemical products by classifying chemical products according to the danger or toxicity of the product including whether they are carcinogenic or flammable, creating a standardized system for labeling that makes this information clear to users, and providing safety data sheets.

### 4.The Stockholm Convention on Persistent Organic Pollutants (POPs) :

▶ Note 1: White ink is not suitable for highly absorbent paper and cloth.

▶ Note 2: Although impression on glass or porcelain are very clear, avoid stamping on these materials used near water.

▶ Note 3: This light corresponds to the sunlight for 200 days outside.

▶ Note 4: If the heat is over 100°C, pigment will burn and turn brown.

▶ Note 5: After testing with the solvent, the impression will be removed, except impressed on cotton cloth.

○ If impression is on non-carbon and thermal paper, colour of the impression can be absorbed or changed.

○ Stamping conditions will vary depending on the surface of the object to be stamped.

Trial stamping should be conducted first to determine results.

○ In case of impression on specific materials and with stamping 2nd process, it is recommended to use TAT ink (Special type).

\*Pigment ink: Character in black **Dye stuff ink: Character in red**

\*Pigment ink is superior to light resistant and chemical resistant.

Dye stuff ink is low viscosity and relatively less sticky on the surface of stamp pad than pigment ink for a long time use.

\*White ink is not suitable for stamping on absorbent cloth and paper.

\*Criterion of drying time: Under controlled tests 20°C±1, 65%±5 humidity.

\*1. It may occur to remove ink when rubbing off strongly.

## <Cautions>

- Stamping conditions will vary depending on the surface of the object to be stamped. Trial stamping should be conducted first to determine results.
- Under the condition of temperature 20°C±1, humidity 65%±5.
- Pigment ink is superior to light resistant and chemical resistant. Dye stuff ink is low viscosity and relatively less sticky on the surface of stamp pad than pigment ink for long time use.
- If you need another colour of STSGA or STGA (Black, Red, Blue, Green, Purple, White), M-505A or M-606N is available.
- As for STSMA, STM-N (For metal) and STSPA, STP-N (For plastic), only black is available. If you need another colour, use M-500A or M-600N.
- Super Quick dry ink is available if less drying time ink than Quick dry ink is necessary.
- \* White ink is not suitable for stamping on absorbent cloth and paper.

Secure marker

With ordinary marker ink, carbon often floats to the top after the ink dries, which makes original text readable again because of light reflection.

Secure marker ink formula minimizes this phenomenon to obscure information.

# How to Use DIY NAME STAMP

**1** Remove the characters you need from the rubber sheet.

\*Characters can be removed by hand. If characters are difficult to remove, cut using scissors.

**2** Insert the characters into the character holder one at a time from the right end, making sure they are facing the correct direction.

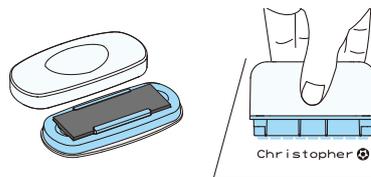

**3** Open the lid of the stamp pad and fill the entire ink pad.

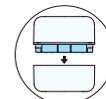

**4** Press the DIY NAME STAMP onto the ink pad a few times and test the stamp before making your final stamp.

● This product uses an oil based quick dry ink. Always close the lid of the stamp pad after use. The next time you use the stamp, make a test impression to check whether the ink is lighter, and refill the ink as required.

\*After use, remember to replace the cap, close the lid of the stamp pad, and store horizontally.
